10 Lines on My Favourite Subject

For Class 1 to 3

My favourite subject in school is Science because it helps me understand the world around me.

Science teaches us about nature, living things, planets, and many interesting facts about our universe.

I love doing experiments in our school laboratory with my classmates and teacher.

Learning about the human body, plants, animals, and their life cycles fascinates me every day.

Science also teaches us how things work, from simple machines to complex technology.

I enjoy reading science books and watching educational videos about space and inventions.

Our science teacher makes every lesson fun by showing us real examples and demonstrations.

Science helps us think logically and solve problems in our daily life.

I want to become a scientist in the future and discover new things for humanity.

Science is not just a subject for me, it is my passion and favorite hobby.

Essay on My Favourite Subject in 100 Words

For Class 3 to 5

My favourite subject in school is Science. I love learning about nature, animals, plants, and how things work around us. Science is full of amazing facts and interesting experiments. Our teacher makes every lesson exciting by showing us real examples and doing practical work in the laboratory. Science teaches us to think, ask questions, and find answers through observation. It also helps us understand our body, health, and the environment. I enjoy reading science books and watching documentaries about space and inventions. In the future, I want to become a scientist and contribute to new discoveries.

Essay on My Favourite Subject in 200 Words

For Class 5 to 8

My favourite subject in school is Science. From the very first day I learned about plants and animals, I became deeply interested in understanding how everything in nature works. Science is not just a subject, it is a way to explore the world around us. I love doing experiments in our school laboratory. Watching chemical reactions, studying the human body, and learning about planets and stars makes me excited. Our teacher explains every topic with real examples, which makes learning easy and fun. Science also teaches us important skills like observation, logical thinking, and problem solving. I read science magazines and watch educational videos in my free time. My dream is to become a scientist and work on projects that can help Pakistan and the world. Science gives me knowledge, confidence, and a clear vision for my future.

Essay on My Favourite Subject in 300 Words

For Class 8 to 10

My favourite subject in school is Science. Ever since I was a child, I have been curious about how things work, why the sky is blue, how plants grow, and what makes the stars shine. Science answers all these questions and opens the door to endless knowledge. I enjoy every topic we study in science class. Learning about the human body, different organs, and how they function is truly amazing. Studying plants, animals, and their habitats helps me appreciate the beauty of nature. I also love physics experiments that show us the laws of motion, gravity, and energy. Our science teacher encourages us to think critically and conduct simple experiments at home. Science is not limited to books. I watch documentaries about space exploration, inventions, and discoveries made by great scientists. I read articles about new technologies and medical breakthroughs. This subject has taught me patience, observation, and the importance of asking questions. My ambition is to become a scientist and contribute to research that benefits humanity. Science inspires me every day, and I am grateful to have such a wonderful subject that shapes my thinking and future. It is not just my favourite subject, it is my passion.

Essay on My Favourite Subject in 500 Words

For Class 9 to 12 & FSc

Introduction

Every student has a favourite subject that they enjoy learning and studying. For me, that subject is Science. From a young age, I have been fascinated by nature, animals, planets, and how everything around us works. Science is not just a subject in my school curriculum, it is a window to understanding the universe and solving real world problems.

Why I Love Science

Science teaches us about living and non living things, their properties, and how they interact with each other. I love studying biology because it explains how our body works, how plants make food, and how animals survive in different environments. Chemistry excites me with colorful reactions and experiments in the laboratory. Physics helps me understand concepts like force, motion, energy, and gravity. Every branch of science has something unique and interesting to offer.

Practical Learning and Experiments

One of the best parts of learning science is doing experiments. Our school has a well equipped laboratory where we perform practical work under the guidance of our teacher. I still remember the day we grew a plant from a seed and observed its growth stages. We also did experiments on electricity, magnets, and light. These hands on activities make science enjoyable and help us remember concepts better than just reading from books.

Science in Everyday Life

Science is not limited to classrooms. It is present in everything we do. From the mobile phones we use to the food we eat, science plays a vital role. Understanding science helps us make informed decisions about health, environment, and technology. It teaches us to think logically, observe carefully, and question everything around us.

My Future Goals

My love for science has inspired me to pursue a career in this field. I want to become a scientist and contribute to research and innovation. Pakistan needs skilled scientists who can solve problems related to energy, health, water, and agriculture. I hope to play my part in making my country stronger through scientific knowledge.

Conclusion

Science is my favourite subject because it satisfies my curiosity and helps me grow as a learner. It is a

subject that combines knowledge, creativity, and practical skills. I am grateful for the opportunity to study science and look forward to exploring it further in my academic journey.
